

PLEASE READ THIS BEFORE YOU USE THE SDK TOOLS.

Developers must comply with the terms of the SDK License Agreement.

Developers shall only use the SDK TOOLS and RSS for developing application for non-medical use.

Developers understand and agree to the following terms and conditions of the RSS.

Remote sensor service ("RSS") provides certain activity information received from Samsung wearable devices (such as Gear2 or Gear Fit) to your mobile device.

Below is the list of information provided by RSS ("Information"):

- User activity status (Run/walk)
- Step counter
- Wearing state

※ The Information collected and/or transmitted by RSS (or any derivatives thereof) is for non-medical informational purposes only, and is not intended to be, nor should it to be used or relied on for any diagnostic, treatment, or other medical purposes.

※ The Information (or derivatives thereof) should not be used as a substitute for professional diagnosis and treatment.
